Chemical Geology 125 (1995) 321–322

CHEMICAL GEOLOGY
INCLUDING
ISOTOPE GEOSCIENCE

Contents Volume 125, 1995

VOL. 125, NOS. 1–2

Research Papers

Rare-earth patterns in zircons from the Manaslu granite and Tibetan Slab migmatites (Himalaya): insights in the origin and evolution of a crustally-derived granite magma
P. Barbey, P. Allé, M. Brouand and F. Albarède 1

Ion microprobe determination of water in silicate glasses: methods and applications
É. Deloule, O. Paillat, M. Pichavant and B. Scaillet 19

Interactions between dissolved silica and carbonate minerals: An experimental study at 25–50°C
R.T. Klein and L.M. Walter 29

Llanvirnian (Ord.) iron ooids in Baltoscandia: element mobility, REE distribution patterns, and origin of the REE
U. Sturesson 45

Geochemical study of a crater lake (Pavin Lake, France): Trace-element behaviour in the monimolimnion
E. Viollier, D. Jézéquel, G. Michard, M. Pèpe, G. Sarazin and P. Albéric 61

Sr and Nd isotopes at the Permian/Triassic boundary: A record of climate change
E.E. Martin and J.D. Macdougall 73

Corrigendum 101

Isotope Geoscience Section

Research Papers

$^{40}Ar/^{39}Ar$ geochronology of biostratigraphically controlled Miocene tuffs from central Japan: Comparison with Italy and age of the Serravallian–Tortonian boundary
G.S. Odin, M. Takahashi and M. Cosca 105

K–Ar age determination of late Quaternary volcanic rocks using the "mass fractionation correction procedure": application to the Younger Ontake Volcano, central Japan
A. Matsumoto and T. Kobayashi 123

VOL. 125, NOS. 3–4

Research Papers

Evaluation of a relaxation geospeedometer for volcanic glasses
M.C. Wilding, S.L. Webb and D.B. Dingwell 137

Mobility of major, minor and some redox-sensitive trace elements and rare-earth elements during weathering of four granitoids in central Portugal
C.H. Van der Weijden and R.D. Van der Weijden 149

Development of an electron microprobe method for the determination of phosphorus and associated elements in sediments
J.-L. Rao and R.A. Berner 169

Early diagenesis of arsenic in sediments of the Kalix River estuary, northern Sweden
A. Widerlund and J. Ingri 185

An example of reverse discordance during ion microprobe zircon dating: An artifact of enhanced ion yields from a radiogenic labile Pb
M. Wiedenbeck 197

0009-2541/95/$09.50 © 1995 Elsevier Science B.V. All rights reserved

Sr and Nd diffusion in titanite
D.J. Cherniak 219
A combined classical ion-exchange and HPIC procedure for the separation of Nd and Sm for isotopic analysis of geological samples
H. Stray and S. Dahlgren 233

Isotope Geoscience Section

Research Papers
Initial isotopic heterogeneity and secondary disturbance of the Sm–Nd system in fluorites and fluid inclusions: A study on mesothermal veins from the central and western Swiss Alps
Th.F. Nägler, Th. Pettke and D. Marshall 241
Origin of late Variscan granitoids from NE Bavaria, Germany, exemplified by REE and Nd isotope systematics
W. Siebel, A. Höhndorf and I. Wendt 249
Stable isotope composition of spelean calcites and gaseous CO_2 from Tylicz (Polish Carpathians)
M. Duliński, J. Grabczak, A. Kostecka and S. Węcławik 271
An experimental calibration of the temperature dependence of oxygen isotope fractionation between apatite and calcite at high temperatures (350–800°C)
S.M. Fortier and A. Lüttge 281
Geochronology of sediments in the Sabine–Neches estuary, Texas, U.S.A.
M. Ravichandran, M. Baskaran, P.H. Santschi and T.S. Bianchi 291
Nitrogen isotope variation of tree rings as a potential indicator of environmental change
S.R. Poulson, C. Page Chamberlain and A.J. Friedland 307

Technical Note
An evaluation of the use of the chromous chloride reduction method for isotopic analyses of pyrite in rocks and sediment
R.J. Newton, S.H. Bottrell, S.P. Dean, D. Hatfield and R. Raiswell 317

Contents Volume 125, 1995 321
